Github: github.com/tauseefbaksh

Email: tauseefbaksh23@lpu.in

Mobile: +91-9795420781

SKILLS

Languages:	Java, C++, Python, C, JavaScript(ES6+)
Web Dev & Frameworks:	React.js, Node.js, Express.js, Spring Boot, Tailwind CSS, HTML5/CSS3
Databases & DevOps:	PostgreSQL, MongoDB, Prisma ORM, Docker, AWS / Vultr, CI/CD, Git
Libraries & APIs:	REST APIs, Asyncio, Telethon (MTPROTO), Zod, TanStack Query, ClamAV
Soft Skills:	Analytical Problem-Solving, Adaptability, Resilience, Detail-Oriented

INTERNSHIP

Web Development Intern Vanillakart (Subsidiary of Emvity Brushflicks) Certificate	Sep' 25 – Nov' 25
- Translated UI/UX designs into functional, interactive features and highly responsive web interfaces using modern component architectures in React.js. - Collaborated with backend developers to integrate custom REST APIs, contributing to robust backend schemas and ensuring seamless server-side functionality. - Managed state verification, database schema alignment, and engineered security-focused route handling for diverse client requirements. - Maintained strict version control practices using Git workflows across collaborative cross-functional tasks.	

PROJECTS

Telegram Sniper Bot – Automated MTPROTO based Claim System Github	Nov' 25
- Engineered an asynchronous, event-driven network bot utilizing Python, Telethon (MTPROTO), and asyncio to handle high-concurrency message payloads. - Implemented strict regex data parsing and an internal memory tracking layer to completely mitigate duplicate transactional processing errors. - Tripled operational performance for the client, increasing active database/event successes from ~150 to over 450 claims. <i>Architectural Note:</i> System design principles are built to scale, providing conceptual patterns easily transferable to containerized microservices and cloud deployments. Tech Stack: Python, Asyncio, Telethon, Regex, Logging	

NexusLearnPay (In Progress / Local Sandbox) Github	Jul' 26 – Present
- Architected a highly scalable monorepo full-stack ecosystem utilizing TypeScript, Node.js (Express), React, and PostgreSQL via Prisma ORM - Implemented secure state management and JWT authentication, engineering modular components for transactional data flow to align with modern Fintech ecosystem requirements. - Configured multi-stage multi-environment local Docker containers (docker-compose) to ensure platform scalability and clean infrastructure deployment. Tech Stack: TypeScript, React.js, Node.js, PostgreSQL, Prisma ORM, Docker, CI/CD	

CERTIFICATIONS & CERTIFICATES

• Computational Theory: Language Principle & Finite Automata Theory Infosys Springboard	Aug' 25
• Master Generative AI & Generative AI Tools Udemy	Aug' 25
• ChatGPT-4 Prompt Engineering: Generative AI & LLM Infosys Springboard	Aug' 25
• Placement Ace: Java Bootcamp Certification (LeetCode–Codeforces Edition) LPU	Jul' 25
• IBM Introduction to Cloud Computing Coursera	Feb' 24

ACHIEVEMENTS

- Secured 1st position in GFG x LPU Innovathon | [Certificate](#)

CO-CURRICULAR ACTIVITIES

- Competed in 24-hour Hackathon *Code-A-Haunt*; built a Soil Health Indicator website in Round 1
- Engaged in 6-hour Hackathon *Code Caravan 2.0*; developed an API-rich weather predictor

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 7.75</i>	Phagwara, Punjab Aug' 23 – Present
The Woods Heritage School <i>Intermediate; Percentage: 78%</i>	Jhansi, Uttar Pradesh Apr' 21 – Mar' 22
The Woods Heritage School <i>Matriculation; Percentage: 82%</i>	Jhansi, Uttar Pradesh Apr' 19 – Mar' 20
